

Manatron Anthem - Featuring Hart Recording Technology

Manatron Anthem is a flexible and powerful records management solution featuring Hart recording technology. Anthem allows recording officials to efficiently manage a wide variety of document groups while improving customer service and decreasing operating costs. Anthem allows recording officials to manage all of the following document groups: birth, correspondence, death, marriage, military discharge, notaries, real estate and UCC documents.

As workloads grow and document volumes increase, many counties are looking for ways to streamline the document recording process. By increasing office productivity and improving accuracy in the document recording process, counties can reduce costs related to growth and increased public demand for document accessibility. Anthem offers a comprehensive solution for records management and automated recording and indexing operations.

Manatron Anthem features:

- Land Records
- Automated indexing
- Vital Records
- eRecording
- Online Marriage
- Redaction
- Public Access

Key Benefits of Manatron Anthem:

- Streamlined user-interface providing easy data entry and a quick and user-friendly solution
- Robust feature set integrates all key functions in the Recorder's office – reception, cashiering, scanning, indexing, public retrieval – including integrating different document types within on single product suite, i.e. land, vitals, courts, marriage
- Nationally recognized proven solution installed in over 45 jurisdictions nationwide and supported by a national and regional user groups

Anthem automates recording activities; simplifies record search and retrieval; allows state-of-the art digital imaging of standard document types; and provides for automated recording, indexing, cashiering, and public inquiry via local office and the Internet. Anthem is the premier records management system, a flexible, scalable document recording/imaging program, which reduces the bottlenecks caused by older platforms and manual processes. Anthem is fully integrated to provide complete records management from document receipt through imaging, indexing, search and retrieval.

Manatron is the nation's leading provider of integrated property software systems and services. With a rich history in recording, property tax management, billing and collection, we have been at the forefront of innovative product and service development since 1969. Our software and systems currently provide over 1300 customers with the power to manage over 25 million parcels. Most importantly, over the last 37 plus years, our software has helped government jurisdictions collect over one trillion dollars in revenue.

We know that providing our customers access to the latest technology is key to their ongoing success. From our first installation until today, we continue to heavily invest to develop the best solution-based products and services for our customers.
