PORTAGE, MI — January 26, 2010 - Manatron, Inc. a global leader in providing integrated, enterprise-level property tax and records management solutions for state and local governments, announced that the Carteret County, North Carolina Register of Deeds office is live on GRM Recorder. Conversion from the legacy Manatron MIRRS solution began in September of this year and with the efforts of both the Carteret County staff and the Manatron Records Management team, a successful go-live was recently completed.

Carteret County is the second Register of Deeds office in North Carolina to install GRM Recorder, with others actively engaged to move forward in the future.

This installation of GRM Recorder includes Land Records, military discharges, plats, vitals, and Public Access.

As workloads increase and many counties are challenged to do more with less, counties are looking for ways to streamline their office processes. By increasing office productivity and improving accuracy in the document management process, counties can reduce costs related to fluctuating volume and increased public demand for document accessibility. Manatron GRM Recorder offers a comprehensive, enterprise-level solution for records management and automated recording and indexing operations.

About Manatron, Inc.: Manatron, a privately-held company and an investment of private equity firms Thoma Cressey Bravo, Inc. and Thoma Bravo, LLC, provides software and services for state and local governments to completely, fairly and efficiently assess real and personal property, and to bill and collect the related property taxes in their jurisdictions. Manatron's software manages the entire property life cycle, which includes deed recording, land records, GIS (Geographic Information System) integration, valuation, assessment administration, personal property, business licenses, cashiering, tax billing and collection, delinquents and tax sales and e-government. Professional services consist of data conversions, installation, training, project management, hardware maintenance, forms processing and printing, consulting and appraisal services. Manatron is headquartered in Portage, Michigan and has offices throughout the United States. Manatron currently serves over 1,500 customers and manages approximately 40 million parcels.

More information about Manatron, Inc. is available at the Company's website www.manatron.com. In addition, learn more about Manatron on [Facebook](#) and [Twitter](#).

About GRM Recorder: Manatron GRM Recorder is a powerful and flexible comprehensive GRM records management solution utilizing the latest technology. GRM Recorder -- formerly known as A2 -- allows recording officials to efficiently manage a wide variety of document types while improving customer service and decreasing operating costs. Built on the Microsoft .NET platform, the solution manages business processes through configurable workflows, reports and templates. GRM Recorder allows recording officials to manage all of the following document groups: real estate, birth, death, marriage, military discharge, notaries, courts, correspondence and numerous others. In addition, the new generic document module also allows an infinite number of various additional document groups to be filed and processed in the system.
