AUSTIN, TX — April 17, 2009 - Manatron, Inc. a global leader in providing integrated, enterprise-level property tax and records management solutions for state and local governments, announced that it has recently installed its industry-leading eRecording Services in three Texas County Clerk offices: Tom Green County, Bastrop County and Travis County.

In February, Bastrop County went live with eRecording as an additional module to their GRM Recorder application provided by Manatron. Travis County recently began using eRecording and has already recorded hundreds of documents with at least three different submission vendors. Tom Green County goes live on Manatron's eRecording solution by April 20 and will mark the sixth installation of this product in Texas.

Each of Manatron's eRecording customers have cited significant increases in volumes in 2009, with one of the largest Texas Counties confirming nearly 75% of their filings are coming through eRecording.

"Travis County is happy to introduce its new eRecording services," said Travis County Clerk, Dana Debeavoire. "We think businesses are going to love the convenience and 'green attitude' of eRecording. No more will companies have to hire runners, find parking, and print reams of legal documents in order to file in the public record."

As workloads increase and many counties are challenged to do more with less, counties are looking for ways to streamline their office processes. By increasing office productivity and improving accuracy in the document management process, counties can reduce costs. With this in mind, Manatron offers a comprehensive, enterprise-level suite of solutions for records management and automated recording and indexing operations.

"eRecording has become a must-have for all Texas jurisdictions," said Greg Effrein, Manatron VP of Records Management. "Counties are able to immediately realize increased efficiency and decreased resources – saving their constituents valuable tax dollars."

About Manatron, Inc.: Manatron, a privately-held company and an investment of private equity firms Thoma Cressey Bravo, Inc. and Thoma Bravo, LLC, provides software and services for state and local governments to completely, fairly and efficiently assess real and personal property, and to bill and collect the related property taxes in their jurisdictions. Manatron's software manages the entire property life cycle, which includes deed recording, land records, GIS (Geographic Information System) integration, valuation, assessment administration, personal property, business licenses, cashing, tax billing and collection, delinquents and tax sales and e-government. Professional services consist of data conversions, installation, training, project

management, hardware maintenance, forms processing and printing, consulting and appraisal services. Manatron is headquartered in Portage, Michigan and has offices throughout the United States. Manatron currently serves over 1,400 customers and manages approximately 30 million parcels. More information about Manatron, Inc. is available at the Company's website www.manatron.com.

About Manatron eRecording: Electronic Recording (eRecording) is the electronic submission of documents to be recorded at the County Clerk and Recorders office. eRecording enables documents to be recorded in seconds as opposed to hours, by automating the recording process. Recorded documents are electronically returned to the submitting company as soon as they are recorded, providing the recording number within seconds.
